

Airborne Hazards and Burn Pit Registry

Veterans who are eligible for the Gulf War Registry may also join the Airborne Hazards and Open Burn Pit Registry, which includes additional data related to airborne hazards. Veterans must visit and complete a questionnaire at <https://veteran.mobilehealth.va.gov/AHBurnPitRegistry/index.html#page/home> to get started. The Veteran can complete it all at once, or log out and return later.

The data collected will help VA understand and respond to the Veteran's health problems more effectively. The Registry also helps VA researchers collect information on health concerns that can aid VA in improving and refining its health care policies.

The questionnaire takes about 40 minutes to complete. The questions have been designed to give VA a broad picture of your health and current and past exposures.

You will be asked a series of questions in the following categories:

- Deployment timeframes and bases to which you were stationed
- Conditions and health issues that cause difficulty with daily activities
- Current and past health symptoms
- Residential history (where you lived)
- Occupational history (what type of work you do)
- Dust, gas, vapors or fumes exposures
- Home environment and hobbies
- Health care use
- Contact preferences

Participation in the Registry does not result in a disability claim. The Registry and disability claim processes are entirely separate.

QUICK FACTS

✓ Free to eligible Veterans and no co-payment	✓ Based on Veterans' recollection of service, not on their military records
✓ Not a disability compensation exam or required for other VA benefits	✓ Veterans can receive additional registry exams, if new problems develop
✓ Enrollment in VA's health care system not necessary	✓ Veterans' family members are not eligible for registry exams
